Urban Forestry Services, Inc. offers professional horticultural consulting regarding trees and woody vegetation growing in urban areas. Our arboricultural services include risk assessment, inventories, appraisals, enhancement, and management recommendations for all types of urban forests, whether they include street trees, park trees, private trees, or native second growth forests that are valued for a wide range of benefits. We also provide vegetation management plans for slopes and native restoration plans for disturbed environments. Together we provide a full range of urban horticultural services for the benefit of vegetation and wildlife growing where we live.

Our services concentrate on the specific cultural requirements for growing trees, and woody plants, such as the appropriate plant for each location, proper soils and adequate volume, maintenance, and the preservation of mature trees planted long ago. Through our International Society of Arboriculture Certification and Registration with the American Society of Consulting Arborists, as well as other sources, we continually review information and train to offer the most practical and effective solutions to horticultural challenges.

We also appraise plants for their landscape value in cases of litigation or damage estimates.

To complete our services, we now offer a wide variety of quality street and landscape trees, with special focus on providing trees of limited height suitable for under power lines and other limited spaces.

Trees in our cities have changed from being considered nice to have, to necessary for where we live, work, and play. As we work to preserve our environment, we realize there is no more critical habitat than human habitat.

We welcome the opportunity to help meet your urban forestry needs.

SERVICES OFFERED

- SITE ANALYSIS FOR TREE RETENTION DURING DEVELOPMENT - Inspecting native forests and established landscapes for site development to provide tree & vegetation protection specifications, enhancement techniques & on-site construction monitoring for contract compliance. Our goal is to keep trees alive after the contractor leaves.

- URBAN FORESTRY MANAGEMENT AND STRATEGY PLANS - Analyzing your community forest and your management resources to develop a plan for quality vegetation planting, management and care. Put your money towards action, not more paper.

- PACIFIC NORTHWEST FOREST GREENBELT MANAGEMENT/NATIVE RESTORATION/MITIGATION - Evaluating greenspaces for hazards, health, diversity, aesthetics, and enhancement/management. Protecting our “Sense of Place”.

- MAINTAINED PARK AND STREET TREE INVENTORIES - Inspecting and documenting tree populations for their conditions, follow-up replacement, maintenance and planting specifications. Sustaining trees for safety, health and functional benefits.

- HAZARD TREE EVALUATIONS/TREE PRESERVATION - Inspecting mature native and ornamental trees on managed landscapes for hazard condition/preservation and maintenance specifications. Provide a balance of safety and aesthetics for the long term.

- LANDSCAPE EVALUATION AND INSTALLATION MONITORING - Pre- and post-landscape installation evaluation for quality, vigor, handling, and planting specification compliance. Plants should be installed right the first time.

- APPRAISALS AND RESEARCH - Comprehensive documentation and reports for estimating vegetation value, for insurance, expert witness testimony, and depositions. Providing reasonable monetary value to long established plants too large to replace.

- PLANT SPECIES SELECTION AND PROCUREMENT - Recommending, locating, and selecting the right tree, and complementary vegetation, for the right place. There are long term advantages to install plants that meet professional specifications.

PRODUCTS OFFERED

- URBAN FOREST NURSERY, INC. - Our 32 acre nursery provides finished high quality trees for urban streets and landscapes. We focus on tree forms for street specifications and trees that are required for limited heights and widths.
